DETAILED ACTION

Drawings

1. The drawings filed 3/15/2004 are accepted by the examiner.

Claim Objections

2. Claims 1-4 are objected to because of the following informalities:

In claim 1, line 3, "the spark" should read "the spark lever";

In claim 4, lines 2 and 3, "wherein protrusion" should read "wherein a protrusion" and "with protrusive wall" should read "with a protrusive wall".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,296,476 to Tsai ("Tsai").

Tsai discloses in the specification and Fig. 1-6 an invention in the same field of endeavor as applicant's invention and as described in applicant's claims 1-4. In particular, Tsai shows a safety switch device for a gas gun comprising a female cover (11), a male cover (12), a switch

Application/Control Number: 10/801,345

Art Unit: 3749

(4), a puller (318, Fig. 3), and a spark lever (at least 23) (see Fig. 1). The female cover (11) is defined with a through hole (14) for insertion of a safety lever (3), a stopping block (317) provided at a side of the safety lever, wherein the spark lever (2) has a corresponding abutting portion (22) that buts against the stopping black at an end of the safety lever formed with a receiving groove (314). The male cover (12) includes a flute (either rod 33 or opening 152) corresponding to the groove (314). A first elastic element (316) is received in the groove.

In regard to claim 2, portion (313) (see Fig. 1) is considered to represent a hooking block as recited. Further, Tsai shows additional elastic elements (312 and 315), either one of which meets the limitation of "another elastic element" as recited.

In regard to claim 3, the safety lever of Tsai operates as recited (see at least col. 3, line 45 through col. 4, line 9).

In regard to claim 4, Tsai shows that the puller (318 and 31) includes a protrusion at a side end of the puller (note protrusion of 318 illustrated in Fig. 3) and the switch is provided with a protrusive wall (342) wherein the protrusion of the puller is employed to abut against the protrusive wall of the switch (see at least col. 3, lines 14-28 and Fig. 3).

Conclusion

5. This action is made non-final. A THREE (3) MONTH shortened statutory period for reply has been set. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.

Application/Control Number: 10/801,345

Art Unit: 3749

6. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. U.S. Patent Nos. 4,292,021 (Miyagawa), 5,531,592 (Tasi), 6,527,543 (Tsai), and

Japanese Patent 11-118151 are cited to further show the state of the art concerning safety devices

in gas guns/lighters.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Examiner Josiah Cocks whose telephone number is

(571) 272-4874. The examiner can normally be reached on weekdays from 8:00 AM

to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ehud Gartenberg, can be reached at (571) 272-4828. The fax phone number for the

organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://portal.uspto.gov/external/portal/pair. Any questions on access to the Private

PAIR system should be directed to the Electronic Business Center (EBC) at (866) 217-9197

(toll-free).
